Email: ankitchowdhary1609@gmail.com
Github: AnkitChowdhary1609
Mobile: +91 7876857173

SKILLS

Languages:	Python, C, C++, SQL, HTML/CSS, Js, Java
Tools/Platforms:	MySQL, Tableau, Power BI, Excel, Jupyter, Google Colab, AWS
Libraries:	Matplotlib, Pandas, NumPy, Scikit-Learn, TensorFlow, Seaborn
Domain Skills:	Data Cleaning, EDA, Statistical Analysis, Machine Learning, Data Visualization
Soft Skills:	Problem Solving, Analytical, Critical Thinking, Teamwork, Communication

EXPERIENCE

Project Based Learning Aug 2023 – Present

- Designed Python-based games, responsive websites, and Android applications using modern frameworks, REST APIs, and backend services.
- Implemented workflow automation using n8n and integrated AI chatbots through Botpress with external APIs to enable intelligent interactions and task automation.
- Applied problem-solving and algorithmic skills across multiple projects, achieving 5-Star HackerRank ratings in C, C++, and Python while strengthening software development and debugging capabilities.

AI Trainer Nov 2024 – Feb 2025

- Managed large-scale data annotation and labeling for AI training datasets, covering text classification, named entity recognition, intent tagging, and image labeling tasks.
- Reviewed, analyzed, and refined AI-generated outputs to improve contextual understanding, reduce errors, and enhance model accuracy across multiple training pipelines.
- Prepared structured datasets, prompts, and question–answer pairs while maintaining data quality standards and consistency required for reliable AI model evaluation and performance optimization.

PROJECTS

Airline Customer Satisfaction (EDA) Project Link Aug 2025 – Dec 2025

- Analyzed a dataset of 60K+ airline passengers using Python (Pandas, NumPy) to identify factors affecting customer satisfaction and service quality.
- Performed data preprocessing, feature analysis, and statistical exploration to understand relationships between flight distance, delays, service ratings, and satisfaction levels.
- Presented insights using Seaborn, Matplotlib, and an interactive Streamlit dashboard for visual exploration of trends and performance indicators.

SneakIn (Website) Project Link Nov 2025 – Dec 2025

- Developed a responsive sneaker showcase website using HTML, CSS, and JavaScript with a modern and user-friendly interface.
- Integrated Google Analytics to monitor traffic sources, visitor behavior, and engagement metrics.
- Implemented an AI chatbot for navigation assistance and product queries while deploying the website on GitHub Pages for public access.

Scan Vault Project Link June 2025– July 2025

- Built a serverless receipt processing system on AWS using S3, Lambda, Textract, DynamoDB, and SES for automated document handling.
- Designed an event-driven workflow where receipt uploads trigger Lambda functions for OCR text extraction and structured data storage.
- Configured IAM roles, access policies, and automated email notifications to ensure secure and scalable document processing.

CERTIFICATES

- OCI 2025 Certified AI Foundations Associate | *Oracle* — Nov 2025
- OCI 2025 Certified Data Science Professional | *Oracle* — Oct 2025
- Cloud Computing AWS | *Cipher School* — July 2025
- Artificial Intelligence Fundamentals | *IBM* — June 2025
- BCG X GenAI Job Simulation | *BCG X* — June 2025

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology, Computer Science and Engineering Aug 2023 - Present
CGPA : 7.75

St Paul's Sr. Sec. School Palampur, H.P
Intermediate - Percentage : 78 % April 2021 – May 2022

St Paul's Sr. Sec. School Palampur, H.P
Matriculation - Percentage : 73 % April 2019 – May 2020
