TECHNICAL SKILLS

Languages	SQL, MySQL, C, C++, Python, HTML/CSS, Java
Tools & Platforms	MySQL, Power BI, Tableau, Excel, Jupyter, Google Colab, AWS
Libraries	Matplotlib, Pandas, NumPy, Scikit-Learn, TensorFlow, Seaborn
Domain Skills	Data Cleaning, EDA, Statistical Analysis, Data Visualization, Machine Learning
Core Competencies	Problem Solving, Analytical & Critical Thinking, Teamwork, Communication

EXPERIENCE

AI Trainer Freelancing	Nov 2024 – Feb 2025
- Managed large-scale data annotation and labeling for AI training datasets spanning text classification, named entity recognition, intent tagging, and image labeling workflows. - Audited and refined AI-generated outputs to strengthen contextual understanding, minimize error rates, and boost model accuracy across multiple training pipelines. - Curated structured datasets, prompts, and question-answer pairs while upholding data quality standards required for reliable AI model evaluation and performance benchmarking.	

PROJECTS

AI Healthcare Chatbot	[Project Link]	Mar 2026 – Present
Python · Streamlit · Machine Learning · NLP · Generative AI · RAG		
- Architected an AI-powered healthcare assistant using Python, Streamlit, Machine Learning, and NLP to predict diseases from symptoms, power an intelligent medical chatbot, and generate personalized health recommendations. - Implemented ML-based disease prediction, symptom severity assessment, BMI analysis, health tracking, and interactive dashboards using Scikit-Learn, Pandas, NumPy, and Plotly for real-time health monitoring. - Integrated Generative AI for medical report summarization, AI-driven health guidance, personalized diet planning, and context-aware conversational assistance, delivering a responsive end-to-end healthcare application.		

AI Student Intelligence & Academic Risk Platform	[Project Link]	May 2026 – May 2026
Python · Streamlit · Scikit-Learn · Machine Learning		
- Engineered an AI-powered student analytics platform using Python, Streamlit, and Scikit-Learn to forecast academic performance and flag at-risk students for early intervention. - Applied Machine Learning models including Linear Regression, Logistic Regression, Naive Bayes, K-Means Clustering, and PCA for predictive analysis and student segmentation. - Delivered interactive dashboards featuring data visualizations, sentiment analysis, and an AI recommendation engine that surfaced personalized academic insights.		

Uber Trips Analysis – Power BI Dashboard	[Project Link]	Aug 2025 – Dec 2025
Power BI · SQL · Excel · DAX · Data Visualization		
- Built an interactive Power BI dashboard analyzing Uber trip data to uncover ride patterns, peak-hour demand, and revenue trends across time periods and locations. - Cleaned, transformed, and modeled raw trip-level data using Power Query and SQL, structuring it into a relational model optimized for fast, accurate reporting. - Designed DAX measures and KPI cards to track key business metrics such as total trips, average fare, and cancellation rate, enabling data-driven decision-making. - Created drill-down visuals and slicers for date, location, and trip category, giving stakeholders a self-service view into operational and customer behavior trends.		

CERTIFICATIONS

OCI 2025 Certified AI Foundations Associate — Oracle	Nov 2025
OCI 2025 Certified Data Science Professional — Oracle	Oct 2025
Cloud Computing AWS — Cipher School	Jul 2025
Artificial Intelligence Fundamentals — IBM	Jun 2025

EDUCATION

Lovely Professional University	Aug 2023 – Present
B.Tech in Computer Science & Engineering – CGPA: 8.04	Phagwara, Punjab
St Paul's Sr. Sec. School	Apr 2021 – May 2022
Intermediate – 78%	Palampur, Himachal Pradesh
